END OF TRANSUNION REPORT

TransUnion Credit Report Fields

1 Inquiry information

Subscriber inquiry information is displayed at the top of the report.

- 1A On every TransUnion Credit Report the inquiring subscriber's TransUnion-assigned code, name, market area where the file resides within the TransUnion system, date the file was created, and inquiry date and time (Central Standard Time) are displayed.

2 Demographic information

Helps verify consumer identification by providing:

- Consumer's name, plus any known aliases
- Current address and date reported
- Up to two previous addresses and the date reported on first previous address
- If available, telephone number and most current and one previous employer (including position and date employment was verified, reported and/or hired)

- 2A Social Security number (SSN) if available

- 2B Date of birth if available

- 2C Phone Append (optional)

Special messages

Highlights specific credit file conditions that may include:

- Presence of consumer statement
- No subject found

Some optional add-on products may also appear.

- 3A An **ID MISMATCH ALERT**[†] message (optional) appears when: the input address, SSN or surname does not match what is on file; when a minimum of four inquiries have been made against the file within the last 60 days; or when an invalid ZIP code is entered.

- 3B **HIGH RISK FRAUD ALERT**[†] messages (optional) appear if: address, SSN or phone number have been used in suspected fraudulent activity; if the information on an application is inappropriate, such as a commercial or institutional address or if the SSN has not been issued by the Social Security Administration or is that of a deceased person as reported by the Social Security Administration.

- 3C The **FRAUD MANAGEMENT PLATFORM**[†] (optional) combines the sophisticated fraud-prevention capabilities of both TransUnion and Acxiom[®] into one process. The solution accesses multiple reference databases from both companies, resulting in a solution that can provide a fraud score, messages, and authentication.

Note that the messages returned with the High Risk Fraud Alert option are also incorporated into the Fraud Management Platform.

- 3D **OFAC NAME SCREEN**[®] (optional) is designed to screen an applicant's name against an enhanced U.S. Treasury Department's Office of Foreign Assets Control (OFAC) database of specially designated nationals, drug traffickers and money launderers.

4 Model profile (optional)

Displays empirically derived scores to help predict a consumer's future credit performance. Other available scores estimate income, project recovery dollars and predict insurance risk.

Risk score factors are displayed numerically or in text, and are displayed in order based on their relative impact on the final score.

*****ALERT***** appears after Model Profile heading when Manner of Payment (MOP) is 7 or greater, or when a negative public record or a collection is present on the file.

5 Credit summary (optional)

Provides a "snapshot" of activity on the consumer's credit report.

- Available as an option covering either total file history or 12-month file history.
- "Total File History" or "12-Month History" is in the upper right hand corner of the credit summary depending on the option chosen.

From left to right, headers in the first row read as follows:

PR: Total number of public records

COL: Total number of collection accounts transferred to a third-party collection agency. These accounts are identified with a Kind of Business (KOB) code of "Y".

NEG: Total number of negative accounts (derogatory) with a current Manner of Payment (MOP) of 2 or greater.

HSTNEG: There are two separate pieces of information in this field. Both relate to historical negative information on a tradeline. Historical negative information is defined as any Manner of Payment (MOP) of 2 or greater, occurring in any month (excluding current month). The first half of this field describes the number of tradelines which have historical negative information and the second half describes the number of occurrences.

TRD: Total number of trades. TRD value is the sum of RVL, INST, MTG and OPN values.

RVL: Total number of revolving and/or check credit accounts (account types "R" and "C")

INST: Total number of installment accounts (account type "I")

MTG: Total number of mortgage accounts (account type "M")

OPN: Total number of open accounts (account type "O")

INQ: Total number of inquiries

From left to right, headers on the second row read as follows:

HIGH CRED: Highest amount ever owed on an account

CRED LIM: Maximum credit amount approved by credit grantor

BALANCE: Balance owed as of the date verified

PAST DUE: Amount past due as of the date verified or closed

MONTHLY PAY: Subscriber-reported monthly payment from the "TERMS" field on the account

AVAILABLE: Percent of credit available for revolving, check credit and open accounts. Field is calculated by subtracting balance from credit limit divided by credit limit.

TOTALS: Totals for second row headers are included for: Revolving, Installment and Mortgage Accounts (Open Accounts and Accounts Closed with a Balance are not shown on sample report)

[†] For more information about any solutions listed in this brochure, please contact your TransUnion sales representative.

Note: Fields with dollar amounts will display K=Thousands, M=Millions.

6 Public records

Public record information is maintained on a consumer's file in compliance with the Fair Credit Reporting Act (FCRA). This information is obtained from county, state and federal courts, and includes civil judgments, state tax liens, federal tax liens, and bankruptcies.

The length of time each record is held on TransUnion's database varies by the type of record.

Typical retention periods (may vary by state)

Civil judgments	Seven years
Unpaid tax liens	Indefinite
Paid tax liens	Seven years from date paid
Chapter 7, 11 or 12 bankruptcies	Ten years
Chapter 13 bankruptcy filings	Ten years
Chapter 13 bankruptcy dismissal or discharges	Seven years
Bankruptcies voluntarily dismissed	Seven years

7 Collections

Identifies consumer accounts that have been transferred to a professional debt-collecting firm. Collection information includes the name of the collection agency providing information, consumer's account number with the collection agency, collector's Kind of Business (KOB) designators and TransUnion-assigned reporting subscriber number (all collection agency subcodes begin with a "Y").

Also included are the Equal Credit Opportunity Act (ECOA) designator^{***}, date the amount was charged off by the original creditor, date the information was verified along with an indicator code^{***}, date the item was turned over to a collection agency (shown as date opened). Also included are original dollar amount of collection, the balance owed as of date verified or closed, name of the original creditor, and an explanation of current account status as reported by the collection agency.

Trades

Provides an on-going historical and current record of the consumer's buying and payment activities.

- Trades are available sorted by most derogatory; followed by date verified or vice-versa.
- Payment pattern is available displaying either 12 or 24 months.

Trade information includes the following:

- 8 **SUBNAME:** Abbreviated name of credit grantor with whom consumer has an account
- 9 **ACCOUNT#:** Consumer's account number with the credit grantor (partial account number will be returned)
- 10 **ECOA:** ECOA is a code representing the ownership designation on the account^{***}
- 11 **SUBCODE:** Credit grantor's Kind of Business (KOB) designator and TransUnion-assigned reporting subscriber number^{***}
- 12 **COLLATRL/LOANTYPE:** Collateral for an installment loan, or the type of loan
- 13 **OPENED:** Date the account was opened
- 14 **VERIFIED:** Date of last update on the account^{***}
- 15 **CLSD/PD:** Date of account status^{***}
- 16 **HIGHCRED:** Highest amount ever owed by the consumer on that account
- 17 **CREDLIM:** Maximum amount of credit approved by credit grantor
- 18 **BALANCE:** Balance owed as of date verified or closed
- 19 **TERMS:** Number of payments, payment frequency and dollar amount agreed upon
- 20 **PASTDUE:** Amount past due as of date verified or closed
- 21 **REMARKS:** Explanation of dispute or account credit condition, as reported by the credit grantor
- 22 **MAXDELQ:** Date on which the maximum level of delinquency for that account occurred
- 23 **AMT-MOP:** Dollar amount of consumer's maximum delinquency and the Manner of Payment (MOP) rating at the time

- 24 **PAYPAT:** The subject's payment pattern with his/her actual rating or Manner of Payment (MOP) over a period of time. Depending on which option a customer chooses either 24 months or 12 months of information will be shown. The default setting is 24 months.

The first position on the left of the first row corresponds to the account status of the previously verified month. This will not correspond to the Manner of Payment (MOP) field, which represents the most recently reported account status, usually the current month. Each subsequent position to the right corresponds to one month further back in time.

In the first example below, the first half of the PAYPAT field is 445543211111. The first position indicates the information reported one month ago (MOP=4):

Manner of Payment (MOP)

One month ago	MOP = 4
Two months ago	MOP = 4
Three months ago	MOP = 5
Four months ago	MOP = 5 Etc.

- 25 **MO 30/60/90:** The four parts of this field summarize any delinquency on the account. The first column represents the number of months being summarized. The second, third, and fourth columns equal the number of times the subject has been 30, 60, or 90 days delinquent, respectively.

In the first example, this field equals 20 1/1/5. This means that 20 months of data was reviewed. The subject was 30 days past due one time, 60 days past due one time, and 90 or more days past due five times.

- 26 **MOP:** Type of Account (R, I, M, O, C) and Manner of Payment (MOP) code at which the account is currently reported^{***}

27 Inquiries

Displays which companies viewed the consumer's credit file over the last two years. Includes date the inquiry occurred, and the inquiring subscriber's TransUnion-assigned account number and name.

- Available in a one or two column display
- If two columns are requested, inquiries are displayed either left to right or top to bottom, by date

28 Consumer statement

Contains an explanation of facts or conditions affecting the consumer's credit file.

29 Inquiry Analysis (optional)

Returns the contact information provided by the consumer when applying for credit within the previous 90 days. Information returned will include the consumer's name and current address, and potentially the consumer's previous address, telephone number, and employment.

30 Credit Report Serviced By

This information should be used to direct consumers to the appropriate location in the event of an adverse action.

^{***} See the codes page of this brochure for more details.

TransUnion Credit Report Codes

ECOA (Equal Credit Opportunity Act) Inquiry and Account Designators

- A Authorized user of shared account

- X Advertising
- Y Collection
- Z Miscellaneous

FICO Scoring - Trans Union Reports

The Trans Union FICO Scores range from <500 to 800+. It is important to remember that, the higher the score, the better the credit risk.

In addition, there will be Score Factor Codes that appear next to the Numerical score provided. These numbers represent those factors that influenced the ultimate score that was derived. [A definition of those factor codes is provided on this page.](#)

FICO Risk Score, Classic	DESCRIPTION
00	No Adverse Factor
01	Amount owed on accounts is too high
02	Level of delinquency on accounts
03	Proportion of loan balances to loan amounts is too high
04	Lack of recent installment loan information
05	Too many accounts with balances
06	Too many consumer finance company accounts
07	Account payment history is too new to rate
08	Too many inquiries last 12 months
09*	Too many accounts recently opened
10	Proportion of balances to credit limits on bank/national revolving or other revolving accounts is too high
11	Amount owed on revolving accounts is too high
12	Length of time revolving accounts have been established
13	Time since delinquency is too recent or unknown
14	Length of time accounts have been established
15	Lack of recent bank/national revolving information
16	Lack of recent revolving account information
17	No recent non-mortgage balance information
18	Number of accounts with delinquency
19*	Date of last inquiry too recent
20	Time since derogatory public record or collection is too short
21	Amount past due on accounts
22T	Serious delinquency, derogatory public record or collection filed
24	No recent revolving balances
26*	Number of bank/national revolving or other revolving accounts
27	Too few accounts currently paid as agreed
28	Number of established accounts
29	No recent bank/national revolving balances
30	Time since most recent account opening is too short
31*	Amount owed on delinquent accounts
36*	Payments due on accounts
38	Serious delinquency, and public record or collection filed
39	Serious delinquency
40	Derogatory public record or collection filed
41*	No recent retail balances
42*	Length of time since most recent consumer finance company account established
50*	Lack of recent retail account information
56*	Amount owed on retail accounts
98*	Length of time consumer finance company loans have been established

Extensive data analysis techniques of the Fair, Isaac Companies combine with the Trans Union consumer credit information in a consumer's credit file and a model is used to give you the quality information and predictive analysis you need to assist in effective credit decisions.

The Scores can be used to help identify those prospects more likely to result in serious delinquency, charge-off or bankruptcy. The goal is to reduce the number of accounts adversely affected by negative actions, while also identifying those with the greatest profit potential.

***Factor currently not in use. Model Alert** message occurs when a credit file contains one or more of the following: previous bankruptcy, derogatory public record, collection activity or a MOP of 7 or higher.

Model Not Scored: Deceased message occurs when the subject's Social Security Number matches the Social Security Administration's deceased Social Security Number file, or is reported as deceased by a credit grantor.

Model Not Scored: Insufficient Credit message occurs when a credit file does not contain a tradeline opened for at least six months and tradeline updated within the last six months.

T FACTOR 22 is only returned with: FICO Risk Score, Classic 95, or FICO Risk Score, Classic 95 Industry Options.

FICO Risk Score, Classic, FICO Revenue Score; and FICO Bankruptcy Risk Score are Fair Isaac products.
